

2019 NCC Seminars  
Presented by ABCB  
2 Formal CPD points in competency of Practice Management

### Learning Outcomes

At the end of this presentation, viewers will be able to:

- Apply the changes to Volume One and Volume Two contained in NCC 2019, and recognise the background to some of those changes.
- Identify the overall structural changes to the BCA, including the new Governing Requirements and common schedules.
- Recognise the latest referenced standards.

### Assessment Questions

- Q1. What replaces Section A of NCC Volume One and Part 1 of NCC Volume Two? Why have these changes taken place?
- Q2. Describe or name at least two new Verification Methods introduced in NCC.
- Q3. Using NCC 2019, from what height must a form of sprinkler protection be provided for a Class 2 or 3 building?
- Q4. Name a subject area that has a new acceptable construction practice in NCC Volume Two.
- Q5. To which building types do the new condensation provisions apply?
- Q6. There are transition periods for the adoption of the energy efficiency changes and a delayed adoption for the Fire Safety Verification Method. Identify when the transition period for energy efficiency ends and when the Fire Safety Verification Method will be adopted?
- Q7. Does every new shopping centre require an accessible adult change facility?
- Q8. Do the new 'occupiable outdoor area' provisions of Part G6 apply to all balconies?
